

Effective storage systems maximise space

The best thing about having a professionally designed wardrobe is that there is a place for everything, meaning no frantic searches for clothing items when you are running late for work.

Every bit of space in a wardrobe should be made to work properly, says Monty McKeefry, director of Beyond Storage. "Working with a designer who specialises in wardrobes means that thought has gone into the design, rather than simply installing a wardrobe."

Assisted in the business by his wife Tracey, Monty has years of experience in the industry and works closely with an experienced builder to design, build and install storage options into new and existing homes.

"After recent earthquake damage to our chimneys we were able to expand our wardrobes within our home. We got in touch with Beyond Storage and after a few meetings with Monty we were extremely happy with our customised wardrobe systems. We were under pretty tight timeframes however Monty and his team worked in well with the builders doing the EQC repairs and the install was quick and efficient. The whole process went very smoothly and Beyond Storage has definitely stood out as a reliable company. We are thrilled with our wardrobes and linen storage. It's great to see a company actually delivering excellent customer service."

- Lisa, Christchurch

"We have completed quite a few installations in homes with earthquake damage. Some of these have been where the chimney has been removed and we have replaced it with a wardrobe. This can also be done where walls need to be removed."

Free installation is currently offered to red zone clients.

Cost-effective standard plans are available, although wardrobes can also be designed to each client's unique requirements.

Working to client budget, Beyond Storage

undertakes work for a broad range of builders and developers as well as in private homes throughout Canterbury.

"Our builders demand quality, and they trust us," Monty says.

Stringent procedures are in place to ensure that the client is totally satisfied with the result.

Beyond Storage also designs storage systems for garages and laundries. Built-in bookshelves, storage units and desks can be built for home offices. Units are available in a range of colours and finishes, including woodgrain.

"Beyond Storage has been a pleasure to deal with. I have used Beyond Storage services to install wardrobes systems in homes that I have built and I was impressed with Monty's customer service, attention to detail and high quality wardrobe systems. I also liked how they worked directly with our clients, discussed their needs and designed specifically to their requirements. I have since had Beyond Storage install wardrobes into my own home. Beyond Storage is a very reliable and trustworthy company and I would definitely highly recommend them to anyone wanting a quality product and service."

- Steve Sugrue, Sugrue Construction Ltd

"We are proudly locally owned and operated and are the only such company we know of with a 15-year warranty."
